

CONSIDER THE OAG1050 STUDY

**Learn about the IC Bladder Pain
study of a new investigational drug.**

You may be able to join the study if you:

- Are a woman between 18 and 70 years of age
- Have been diagnosed with interstitial cystitis (IC) or bladder pain syndrome (BPS), or meet criteria for IC/BPS as defined by the American Urology Association
- Have bladder pain or discomfort with lower urinary tract symptoms for at least 6 months

Other criteria will need to be met to confirm your eligibility for the OAG1050 study.

If you qualify, you may receive at no cost:

- Access to the study drug
- Close care and monitoring of your condition
- The opportunity to help advance the treatment of interstitial cystitis and bladder pain syndrome

Reimbursement may be available for study-related time and travel expenses.
